

## MOBILE AND ON-SITE SERVICES

### Combo Trailer

- Produces 200 gpm low conductivity product water under a variety of raw water conditions
- Provides multi-media, carbon or softening pretreatment consistent with the raw water's impurities
- Can be configured as a 90 gpm, two-pass unit for applications requiring extensive DI polishing

### Mobile Clarification

- Produces stable, high-quality effluent from rapidly fluctuating raw water sources
- Suitable for difficult to treat waters such as high or low turbidity, high color/TOC, cold water or high algae
- Contains equipment and instrumentation for fully automated and monitored operation

### Mobile Demineralization

- Treatment of choice for zero-discharge applications and seasonal treated water needs
- Treats water without the need for on-site waste generation, hazardous chemical handling or capital investment
- Trailers configured to match your exact capacity and flow needs up to 600 gpm

### Mobile Ultrafiltration

- Produces low SDI water from various raw water sources
- Suitable for difficult to treat waters such as moderate turbidity, color and TOC
- Trailer configured for flow rates up to 700 gpm

### Mobile Filtration/Pretreatment

- Horizontal filter trailer, largest capacity single flow unit at 1200-1600 gpm
- Pretreatment trailer contains six automated PreFlex® 54
- MPT vessels in parallel or series for 400-600 gpm
- MPT+ Pretreatment trailer contains six automated PreFlex 60 vessels in parallel or series for 400-1,200 gpm
- Multi-media for turbidity and SDI reduction
- Activated carbon for organic removal and dechlorination
- Green sand and specialized media for iron and manganese control
- Ion exchange resin for softening or dealkalization

### Mobile Separations Trailer

- Standardized membrane separations modules
- MST-600 Trailers configured for flow rates up to 600 gpm, 300 gpm double pass RO
- MST-400 Trailers with up to four FlexRO® configured for flow rates up to 400 gpm, 180 gpm double pass RO
- MST+-400 Trailers with two Vantage® M84 units configured for flow rates up to 400 gpm, 180 gpm double pass RO

### Skid-Mounted Assets

- FlexRO 100 gpm reverse osmosis units
- Vantage 200 gpm reverse osmosis units
- PreFlex filtration/pretreatment units for a variety of applications and environments
- FlexTrex® deionization units for service deionization or polishing of RO permeate water

### Build-Own-Operate

- Guaranteed water quality, quantity and cost
- Reduces plant operating expenses
- Preservation of investment capital
- Elimination of on-site hazardous chemical storage, handling and disposal
- Reduces plant waste streams

### Service Contracts

- Customized contracts for specific equipment requirements
- Local service allows scheduling and repairs when you need them
- Reduces manpower requirements
- Standard documentation and reporting included with every contract

### Turnkey Media, Resin Services & Resin Tankering

- Reduces labor cost and down time
- Facilitates documentation and record keeping
- Ensures complete environmental compliance

### Service Deionization (SDI)

- Regenerated off-site to eliminate hazardous chemicals and wastewater on-site
- FlexTrex® units can be configured in parallel or series, and combined with other products
- Large inventory to meet customer needs for seasonal, emergency, pilot or short-term requirements

### Membrane Care<sup>SM</sup> Program

- Improves membrane reject and flow, reducing post-RO polishing costs
- Increases membrane life
- Reduces system downtime
- Reduces water and power consumption

### Aftermarket Parts and Services

- Replacement OEM components
- Extensive resin inventory and specialized regeneration capability
- Full spectrum of RO membranes
- Turnkey media and resin replacement

### Environmental Services

- Groundwater remediation
- Activated carbon systems
- Wastewater ion exchange
- Off-site regeneration or disposal
